LLMOps Spotlight

mlflow™ // Blue Guardrails LiteLLM

You can't improve what you don't measure.

Classic AI Cycle

5%

- Lean Business Case
- Deployment in Shadowmode
- Historical Simulation
- Monitor Business Impact

30%

- Plan technical solution
- Build technical solution
- Integrate technical solution
- Deploys technical solution

5%

- Evaluate the results
- Review the process
- Determine the next steps

10%

- Select modeling technique
- Build model
- Assess model

10%

- Gather background information
- Accessing the situation
- Determine data science goals
- Plan the project

15%

- Collect initial data
- Describe data
- Explore data
- Verify data quality

25%

- Select right Data
- Clean data
- Extend data
- Format data

The AI Reliability Layer

Blue Guardrails: Reliability layer for AI applications

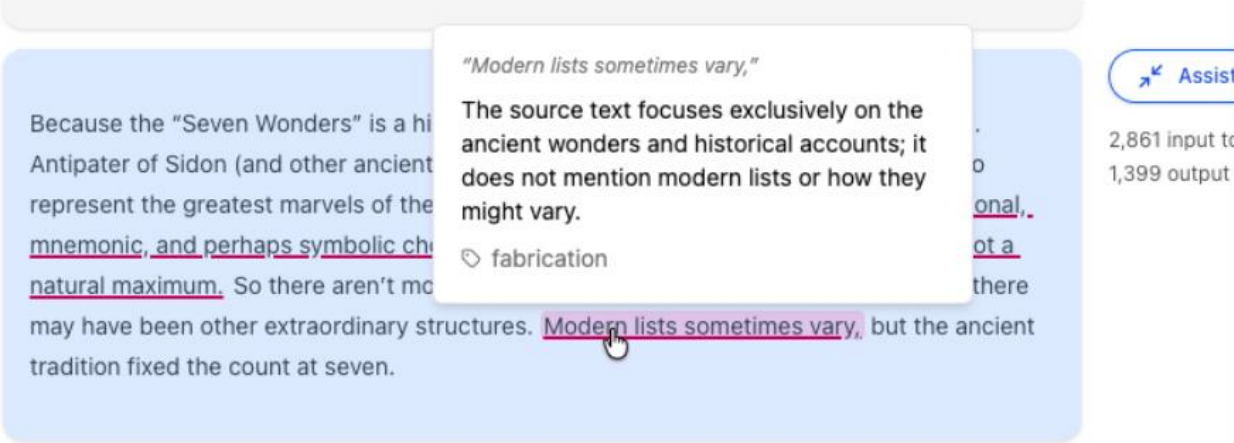
Experiment Comparison Docs

	sonnet-4.5	gpt-5.2	flash-2.5
Model	claude-sonnet-4-5	gpt-5.2	gemini-2.5-flash
Items	9	9	9
Hallucination Rate	55.6%	44.4%	55.6%
Costs/1k Prompts	$14.23	$9.41	$2.33

Hallucination Types

Our Platform

- ✓ Checks every AI output for hallucinations and other quality issues down to a single claim
- ✓ Can detect complex semantic inaccuracies due to the use of large reasoning models
- ✓ Enables systematic error analysis and auditing of AI applications
- ✓ Creates visibility and observability
- ✓ Available on-prem and in the cloud
- ✓ Enables AI Governance and Control



mlflow

- End-to-end monitoring and experimentation
- Model registry & deployment management
- Basic LLM-as-a-judge
- AI gateway & provider abstraction
- Hyperparameter tracking & optimization

➡️ Comprehensive MLOps solution

// Blue Guardrails

- Claim-level hallucination detection, incl. dedicated explanations
- Higher accuracy than LLM-as-judge approaches
- Sophisticated root cause analysis tools
- Domain-specific customization for your context

➡️ Hyperfocus on Hallucination detection & mitigation

💡 **You can use them simultaneously:** MLflow for comprehensive ML operations + Blue Guardrails for specialized hallucination detection and mitigation. Both use OpenTelemetry (OTLP protocol) standard.
